FLIEGER, HOWARD

Memo to our readers; favorable response to Howard Flieger's editorial denouncing sketches of Communist figures, unflattering sketch of Pres Nixon on walls of Bicentennial Center in Washington, D C, F 11 p 4

Editorials

Resolution, 1974; worthwhile resolution: get more concerned about state of nation; Sen Robert C Byrd made speech about complacency, apathy, absence of deep convictions; to him, strength of character, dedication to principles are foundations on which nation was built; would be sound wisdom to re-examine those foundations, shore them up before it's too late, Ja 7 p 68

Point of no return? former Price Comm Chrmn, C Jackson Grayson, says he sees evidence U S shifting econ style; business, labor seek to reduce competition; Amers increasingly distrust market system, demand Govt assure econ benefits; much of the public feels central planning not only desirable but superior; unless trend reversed, book will be closed on free-market system as we know it, Ja 14 p 76

Next: too much fuel? are we on brink of energy glut? "The Economist" of London thinks so, bases conclusion on historical precedent:

FLIEGER, HOWARD—Contd.

paths of history strewn with examples of prophets foretelling dire shortages, then confounded when scarcities turned into surpluses; theory might be right, but U S would be foolhardy to count on it, must start now to become self-sufficient in energy, Ja 21 p 84

Worst joke in 200 years; Amers have been insulted; Bicentennial Center in nation's capital has mural depicting Communist leaders; an official explains "all were involved with the United States over the past 200 years"; muralist said he sketched people he considers interesting, had a "lot of fun," seemed to regard affair as clever joke; those who had anything to do with it should hang heads in shame, Ja 28 p 84

Leadership: look again; there is much talk by political leaders abroad about "moral bankruptcy" in U S, and our unreliability in crises; against background of Amer behavior from start of Mideast war to Egypt-Israel agreement to disengage, critics abroad are going to have hard time making very convincing case when it comes to world leadership, F 4 p 80

Castro — who needs him? hints are surfacing that Cuba's Fidel Castro wants to get in good graces of U S Govt, business, is willing to resume "normal relations"; important things must be weighed before he is welcomed into embrace of U S; Castro doesn't strike one as sort of person U S ought to forgive, offer helping hand; he needs U S more than U S needs him, F 11 p 92

Forget it; with Nixon Admin under attack, we are hearing that U S would be better off with parliamentary form of govt; followed to letter, system could be made to work here, but place would never be the same; we would have to rewrite or discard Constitution, abandon traditions; U S voter would have to give up notion he elects Pres, F 18 p 100

What can I do? David Lawrence, founder-Editor of this magazine, died year ago this month, but many of his thoughts live on; he believed strongly in power of public opinion; excerpts from his editorials of Feb 8, 1952, Jan 30, 1953; answer to citizens' question is to keep informed on issues, express views, vote; Amer has been, is governed in major policies by wishes of people, F 25 p 94

Hats off to Joe Blow; this is season when citizens are singled out, honored with awards for service to profession, community or nation; in this context unsung hero is "Joe Blow," average, undistinguished, indistinguishable, typical U S citizen; Joe will do for his country all that is asked of him and more if he's convinced it's necessary; politicians would do well to pay him close heed, Mr 4 p 84

Learning about Russia; "USN & WR" for first time has decided to station staff mbr inside Soviet Union because it's becoming increasingly possible to do real reporting in Russia, to cover new U S-USSR econ relationship — Russia as source of energy, U S as source of food, credit, technology — how Russian people live, work, relax, spend their money, Mr 11 p 92

Oil-stained politics; Amers searching for political bad guys in energy crisis could do worse than examine performance of Cong — which is not to say Admin is without blame; Energy Emergency Act took four mos to clear Cong, and everybody knew it would be vetoed; White House, Cong have erred; it's high time both stop pointing fingers at one another and get down to work — together Mr 18 p 108

Dropout's lament: nearly 50 mbrs of Cong have decided to retire after present session; customary reasons are given — health, family, money, bad year for "ins" — but there is more to it; one dropout explains why: it goes to role in these times of Cong designed two centuries ago, and involves political place, atmosphere, attitude known as "Washington," Mr 25 p 96

"You can fool ... " etc; democratic govts have come upon unhappy times almost everywhere; probably gaudy oversimplification to blame all woes on inflation, but it could be politicians are risking the future because they are unwilling to ask voters to face up to discomforts of austerity; leaders may be discounting both knowledge, understanding of ordinary people, Ap 1 p 84

If kidnapers can't win — ; kidnapings for financial, political profit come in waves; that most end in failure — capture, imprisonment, death of perpetrators — does not deter; one suggestion is to keep kidnaping activities out of news; more drastic proposal by Prof William H Peterson: make payment of ransom crime against society; only harshest of measures will bring kidnaping to an end, Ap 8 p 84

Ever meet a lobbyist? public familiar with caricatures of lobbyists dangling legislators like puppets; Rep Barber B Conable, Jr, has kind words about them, says political system couldn't work half so well without reps of special interest groups; there are shortcomings, but almost universal tendency by public to look with suspicion on lobbying is nonsense, Ap 15 p 104

It's time to be quiet; mbrs of Cong should stop sounding off for or against impeachment of the Pres; if articles of impeachment emerge from House Judiciary Com, they are the persons who will sit in judgment; under circumstance it is unseemly, to say the least, for Sens, Reps to be publicly discussing Pres's guilt or innocence, Ap 22 p 92

A national challenge; cross-section of letters, both sympathetic and angry, in reaction to proposal previously reported on Editor's Page to make ransom payments in kidnaping a crime; significance of such mail important: to uncounted thousands, situation more upsetting than other preoccupations of Washington; they want action against kidnaping punitive enough to stop it for all time, Ap 29 p 92

Goodbye, good riddance; direct controls over wages, prices die quietly with end of April; 2 1/2 yrs of phases, freezes, thaws have wrought hardships, abnormal scarcities, still-rising prices; purpose of price-control program is to check rising cost of living, but this one didn't; controls created more problems than they solved, My 6 p 92

Short memories; human nature being what it is, yesterday's crisis is last night's bad dream; but energy crisis is bit like concealed weapon, can catch you by surprise; it isn't going away permanently until one of two things happens: either we make dedicated effort to produce lot more fuel, or we tailor use of energy to living within our means, My 13 p 92

Lame duck impeachment? to remove impeachment from politics, suggestion being made to time House impeachment vote to come after Nov election, before new Cong convenes in Jan; it's difficult to justify leaving balance of power to decide Pres's future in hands of "lame ducks" — retiring Congmen and those defeated in Nov — who have no obligation to electorate, My 20 p 100

So proudly we hail: National Anthem has become target of faultfinders; "Wall Street Journal" reporter recently chronicled litany of complaints against song; but start looking for suitable replacement, you run into problems; anyway, why look? surely there are better things to do in these trying times than complain about "The Star-Spangled Banner", My 27 p 88

The other half: people prone to pass judgment on others should take time to learn nature of "others"; examples of college pres who tried manual labor, team of psychiatrists' close-up look at "Blue Collar Blues," criminology prof who joined police force seem to add up to this: to talk meaningfully about how other half lives, better spend time living with other half, Je 3 p 84

Riddle: how is more less? with popularity of escalator guarantees in wages, benefits, question arises: why not tie everything, everybody to rise, fall of official consumer price index? some econs see merit to idea, called "indexation"; it would give everybody more money, but money would be worth less; is that any way to deal with inflation? Je 10 p 104

Mission to Moscow; as Pres Nixon plans for his mission to Moscow, keep in mind that *detente* doesn't mean same thing to Soviet leaders that Amers would like to think it does; lessons of Mideast, strategic arms, econ relations provide practical assessment; but *detente* should not be abandoned, for it is far better than dangerous folly of cold war, Je 17 p 104

A disservice to America; trust Sec of State Kissinger inspired in Mideast shuttle diplomacy was important ingredient in his success; news leaks casting doubt on his role in telephone taps four yrs ago beclouded that trust; whatever motives of leakers may have been, their timing was appalling, Je 24 p 88
